

KOMATSU SUPERCoolANT

Did you know that up to 50% of engine failures can be directly related to improper cooling system maintenance?

Komatsu has taken a proactive approach to eliminate these premature engine failures with the advanced formulation of Komatsu Supercoolant (antifreeze) AF-NAC.

Supercoolant is an ethylene glycol based extended life engine coolant specially designed to provide long lasting protection for modern engines.

Product Application

- Approved formula for all Komatsu machines
- Designed for maximum protection of Komatsu engines and all metal types
- Nitrite free formula that contains a blend of phosphate and **organic acid technology (OAT)** to stop corrosion and oxidation in diesel, gasoline, and natural gas

Features and Benefits

- Supercoolant has been tested and proven to work in high temperature/extreme conditions
- Meets or exceeds all ASTM D3306 and JIS K2234 standards
- Improved productivity and lower operating costs for the life of your equipment

SUPERCoolANT	PRE-MIXED 50/50
1 Gallon	C 1400SC100
5 Gallon Pail	1400SC101
55 Gallon Drum	1400SC102
275 Gallon Tote	1400SC103

SUPERCoolANT	CONCENTRATE
1 Gallon	C 1400SC200
55 Gallon Drum	1400SC202

Recently approved
for up to 6,000 hours!

QUICK TIP!

Supercoolant is specially formulated to keep heavy equipment operating at peak performance. **Supercoolant has a blue color.** Do not mix with other brands of antifreeze. Be sure to perform a system flush before using Supercoolant for the first time.
