

Komatsu AX080 Genuine Lubricant

Wet Brake Fluid and Axle Oil

A unique formulation for ultimate brake and axle protection

- Formulated specifically for heavy braking and torque loads
- Special frictional properties safeguard off-road limited slip differentials
- Ensures proper operation of wet brake components
- Prevents “brake chatter”

**ORDER YOUR KOMATSU AX080
GENUINE LUBRICANT TODAY TO
PROPERLY PROTECT WET BRAKES
AGAINST BRAKE CHATTER.**

The Difference Matters™

Komatsu AXO80 Genuine Lubricant

Komatsu AXO80 is an advanced wet brake fluid and axle oil uniquely formulated to match the load requirements and shear dynamics seen in heavy-duty, off-road applications. Unlike wet brake fluids for agriculture equipment, Komatsu AXO80 is designed for the heavy braking and torque loads in construction and mining equipment. Its special frictional properties safeguard off-road limited slip differentials and oil-cooled disc brakes (wet brakes) to effectively protect machines against “brake chatter”.

Improved Productivity

Equipment breakdown can severely compromise a project's schedule and negatively impact its bottom line. Komatsu AXO80 helps keep machines running at their optimal performance. Its high viscosity index gives Komatsu AXO80 outstanding cold-flow properties enabling it to protect axle components even in winter cold-start conditions. Likewise, in high temperature climates, Komatsu AXO80 is able to adequately remove the heat generated during braking operations.

Improved Safety

Brake performance is a top-of-mind safety concern for heavy machinery owners and operators. Komatsu AXO80 helps ensure wet brakes perform properly for the entire life of your equipment.

Lower Operating Cost

Using high-quality, appropriate lubricants correctly can help to lower operational and maintenance costs, and extend the life of equipment. As a high-quality Komatsu Genuine Lubricant, Komatsu AXO80 not only outperforms, but also helps reduce component replacement costs over time compared to lower-quality fluids on the market that offer less protection.

EXPERIENCE THE DIFFERENCE
Komatsu's AXO80 advanced, uniquely formulated wet brake fluid and axle oil can make for your heavy-duty, off-road applications
