

KPRIME TOOTH SYSTEM

SAFETY ENHANCEMENTS

- ▷ Intuitive locking system
- ▷ Pry slots on tooth and wear cap for easier removal of worn parts
- ▷ Low torque pin for easy tooth changes
- ▷ Weights marked on all parts

PRODUCTIVITY

- ▷ 10% - 15% increased usable wear material
- ▷ Improved penetration by up to 15%
- ▷ Wear indicators on wear cap and fastener
- ▷ Rotatable tooth for extended life
- ▷ Wear material added to adapter legs for longer wear life
- ▷ Designed to stay sharp for the life of the tooth

RELIABILITY

- ▷ 10% stronger design reduces breakage
- ▷ Improved pin design prevents unlocking after extended use
- ▷ Optimized design reduces wear on adapters
- ▷ Improved stability through tighter fit design of tooth to adapter

This new tooth system has a better fitment for improved reliability; better steel usability for longer wear life; a streamlined profile to improve production and a more reliable fastener system for improved reusability and secure lock.
